

Aasif Anwar

PRODUCT DESIGNER · UX DESIGN & RESEARCH

+91-9709452140 · aasif.nid@gmail.com · [Portfolio](#) · [LinkedIn](#)

5 years at Cuemath designing products for 200K+ students across 80+ countries. Background in mechanical engineering, game design, and learning systems gives me three complementary perspectives: systems-level thinking, understanding what drives engagement and behavior change, and clarity on learning outcomes. I bring all three to product problems where process, people, and interface are inseparable.

EXPERIENCE

Product Designer II · Cuemath

Apr 2025 – Apr 2026

New Trial Experience — Parents waited 2–3 days for an AC call about enrollment. Redesigned the entire journey to distribute the work: system automation (WhatsApp verification, slot booking), teachers (relationship-building), parents (direct enrollment). 70% less AC intervention while maintaining conversion. Secondary wins: 50% QL-to-trial lift, 9.6% trial-to-paid lift.

Feel Check (SEL Tools) — Tutors couldn't see how students arrived emotionally. Lost 15–20 minutes to dysregulation. Designed a 90-second student-led check-in using the Wheel of Awareness framework. Tested with 417 students across 4 cohorts. 89.3% of students engaged without prompting. 67.45% of tutors observed improved readiness to learn.

Product Designer I · Cuemath

Apr 2022 – Mar 2025

Student Transfer System — Manual transfer process was bottlenecked with 600+ pending requests and 5% churn rate. Designed automated matching system with teacher availability and student preference algorithms. Shipped in 2 weeks. Results: churn dropped from 5% to 0.2%, first class attendance improved to 92%, successful transfers on first attempt reached 85%.

CueTutor License & Trial Allocation — Built new license system with tutor-level trial allocation preferences. Reduced scheduled trial cancellations by 12%. Shipped cross-functionally with PMs and engineering.

e-CNA Flow — Signup funnel wasn't capturing what parents actually needed. Redesigned to ask real questions, improve lead quality, and route better. 8% QL-to-trial lift, 4% QL-to-paid lift.

Associate Game Designer · Cuemath

May 2021 – Mar 2022

Built interactive games embedding computational thinking into coding lessons. Gamified Cuemath's v3 math curriculum.

Gamified Curriculum Designer · Mastree (Unacademy)

Nov 2020 – Apr 2021

Crafted interactive math lessons for Inspirational Maths — India's first skill-based K–12 program.

Led design and development of digital math games for primary students in MP government schools.

EDUCATION

National Institute of Design (NID)

M.Des. in Industrial Design · 2018–2021

Nalanda College of Engineering

B.Tech. in Mechanical Engineering · 2011–2015

SKILLS

Interaction Design · UX Research · User Journeys · Usability Testing · Information Architecture · A/B Testing · Funnel Optimization · Wireframing · Prototyping · UI Design

TOOLS

Figma · Claude Code · Gemini · Wispr Flo · Vercel · Notion · Mixpanel · Miro · Slack
