Gurugram, India

SUMMARY

Product designer with **4+ years at Cuemath** — a global K–12 math platform serving 200,000+ students across 80+ countries. Designed across the full product stack: growth flows, platform redesigns, and in-class learning tools. Delivered measurable outcomes: **9.6% lift in trial-to-paid conversion**, 12% reduction in trial cancellations, 8% increase in qualified leads. Background in Industrial Design (NID) and design research (IIT Kanpur).

EXPERIENCE

Product Designer II · Cuemath

Apr 2025 – Apr 2026

LEAP Platform Redesign	Owned UX for Cuemath's core tutoring platform; redesigned homepage and chapter view through user journey mapping and iterative stakeholder collaboration; improved session completion and engagement platform-wide.
SEL Tools	Defined and shipped three pre-class tools used in every live session: Feel Check (mood check-in), Focus Zone (attention primer), Riddle Zone (cognitive warm-up); grounded in usability testing.
Math Fitness Assessment	Monthly evaluation experience rolled out across all active students; reduced test anxiety through accessible, low-stakes framing validated through user feedback.

Goal Creator	Mapped and shipped user journeys connecting short-term class goals to long-term learning milestones; drove goal-setting adoption across the student base.
Cuemath Partners	Affiliate program for the US market; owned sign-up flow, affiliate dashboard, and admin controls; shipped cross-functionally with engineering and growth.
Puzzles & Stickers	In-class engagement features validated through A/B testing; increased student participation without disrupting the learning arc.

Product Designer I · Cuemath

Apr 2022 – Mar 2025

Trial Experience Redesign	Mapped and redesigned the full trial user journey using data analysis and A/B testing; increased trial-to-paid conversion by **9.6%**.
CueTutor License	New license system with tutor-level trial allocation preferences; reduced scheduled trial cancellations by **12%**; shipped cross-functionally with PMs and engineering.
CNA Flow	Data-driven sign-up funnel redesign; introduced needs-capture to improve lead quality; boosted QL-to-trial by **8%** and QL-to-paid by **4%**.
Teacher Recruitment	Led UX for the full tutor onboarding flow from application through first class; partnered with ops and recruitment stakeholders.
Performance Marketing	Conversion-focused landing pages iterated using data and growth team feedback.
Admin Tools	Internal tooling for curriculum ops and support; validated through usability testing with internal users.
Student Transfer System	Bulk transfer feature that reduced churn caused by teacher transitions.

Associate Game Designer · Cuemath

May 2021 – Mar 2022

Built interactive games embedding computational thinking into coding lessons; drove gamification of Cuemath's v3 Math curriculum in collaboration with curriculum and engineering teams.

Gamified Curriculum Designer · Mastree (Unacademy)

Nov 2020 – Apr 2021

Crafted interactive math lessons and gamified content for *Inspirational Maths* — India's first skill-based K–12 math program.

Project Associate, Design · IIT Kanpur Apr 2017 – Jun 2018

Led design and development of digital math games for primary school children in MP government schools; contributed to physical product design projects.

SKILLS

Interaction Design · UX Research · User Journeys · Usability Testing · Information Architecture · Design Systems · A/B Testing · Funnel Optimisation · Wireframing · Prototyping · UI Design · Design Thinking · Gamification

TOOLS

Figma · Notion · Mixpanel · Miro · Slack

EDUCATION

National Institute of Design (NID) 2018 – 2021

M.Des. in Industrial Design

Nalanda College of Engineering 2011 – 2015

B.Tech. in Mechanical Engineering
